Sydney - Wednesday - January 27: (RWE Aust Business News) - **Raisama** (ASX:RAI) has intersected multiple high grade zones of uranium at Kashkasu II project, Kyrgyz Republic.

Assays from four holes include 5m at 327ppm from 33m, 3m at 499ppm from 44m, 2m at 454ppm from 50m, 5m at 465ppm from 55m, 2m at 578ppm from 103m and 2m at 1521ppm from 77m.

The results confirm the company's opinion of the prospectivity of the project and that it warrants further systematic exploration.

Mineralisation has been identified at surface over a strike extent of more than 350m.
